EXPERIENCE

PHP Web Developer

iSenseLabs

June 2015 – September 2015

In my internship, I worked using PHP, MySQL, HTML, CSS, JavaScript, jQuery and MVC and following the SCRUM methodology. In addition to learning and improving my skillset I also provided technical support for existing customers. Main projects I worked on were SMSBump.com and extending functionalities of OpenCart platform.

- Participations in MLH Hackathons in Glasgow 2014, Edinburgh 2015, Glasgow 2016
- Second place at Cyber Defense Exercise Glasgow 2016

VOLUNTEERING

Glasgow University Bulgarian Society IT Convenor

Ongoing

As part of the board of the Bulgarian society my main responsibilities are to maintain every IT related issue concerning the society activities. As well as this, I am just as involved with every other aspect of the society's activities such as parties, movie nights, sports tournaments, pub quizzes and more.

Glasgow University Consulting Society IT Consultant

Ongoing

As an IT consultant for GUCS I am responsible for fixing any technical issues that the society has, configuring a business email and building a new website for the society's needs.

3rd Year Computing Science Class Representative

Ongoing

Being a class representative for the Computing Science course involves getting my classmates' views on their learning experience, representing the majority of the views of my class at staff-student meetings, discussing new ideas with the other class representatives and reporting back to my classmates. I believe that this is a great way for me to improve my interpersonal, organisational, team work and negotiation skills.

KEY SKILLS

Development

Python	C	C++	Java	PHP

Software Products

Photoshop	CorelDraw	R-Studio	LogicWorks
MySQLWorkbench	Active-HDL		

LANGUAGES

Bulgarian

Native

English

Proficiency

Russian

Basic

PROJECTS

Federated Health Search Application

February 2016 - April 2016

The application lets people search across two different medical sites (Medline and Healthfinder) and the general web (bing) and save the information that they find into different folders. My team and I used technologies such as Django, JavaScript, Ajax, HTML and CSS. My main responsibility was to build the profile managing functionality and I also helped my teammates with their tasks.

Glasgow University Consulting Society Website

Ongoing

A website currently being developed that would introduce the user to consulting and the society in the university. It would give the user access to all of the useful materials that the society has, allow him to sign up, pay yearly membership and register for events. I am using the Python Django Framework as well as JavaScript, Ajax, JQuery, HTML and CSS.

MY PASSIONS

REFEREES

- Mihail Stoychev - CEO iSenseLabs
- William Cockshott – Academics Advisor

Would be happy to provide their details if required.
